CALCULATING "AMOUNT FROM TABLE" FOR LINE 9 OF THE WORKSHEET

- 1. Look at the Child Support Table.
- 2. Circle the amount in the Table under "Parents' Combined Annual Income" that is closest to the "Combined Adjusted Gross Income" on **Line 7c** of the Worksheet.
- 3. In the "Number of Children" column, circle the TOTAL number of children in this case. Draw a line from the circled number of children down the column until it meets the circle you drew for parents' yearly combined income. Circle the number and write the number you circled in the space after "amount from table" on Line 9b of the Worksheet.
- 4. For example, if you have two children and a combined adjusted gross income of \$18,000, use the column for 2 children. The "Parents' Combined Annual Income" and the "Number of Children" lines should meet at \$54.
 - Using this example, you would write the following on the Worksheet:
 - 9. Total number of children 2 multiplied by amount from table \$ 54 = \$ 108 .

NON-PRIMARY CARE PROVIDERS WITH VERY LOW INCOMES

When the non-primary care provider's income is very low, different rules for calculating child support apply. If the annual gross income of the non-primary care provider is less than the federal poverty guidelines, the non-primary care provider's weekly parental support obligation may not exceed 10% of the non-primary care provider's weekly gross income, regardless of the amount of the parties' combined annual gross income. No additional amounts such as health insurance, child care, or extraordinary medical expenses should be added to this total. Please note this amount is calculated assuming a household of one person.

If the non-primary care provider's annual gross income, without adjustments, is in the self-support reserve for the total number of children for whom support is being determined, the amount listed in the self-support reserve multiplied by the number of children is the non-primary care provider's basic support obligation for the children, regardless of the parties' combined annual gross income. The non-primary care provider's proportional share of childcare, health insurance premiums, and extraordinary medical expenses is added to this basic support obligation. This paragraph does not apply if its application would result in a greater support obligation than a support obligation determined without application of this paragraph.

If the non-primary care provider's income falls in the self-support reserve (the shaded area of the Child Support Table), check the box in the non-primary care provider column next to "self-support reserve" on the child support worksheet. If the non-primary care provider's income is lower than all income amounts listed in the Child Support Table, check the box next to "below poverty level" on the child support worksheet.

CALCULATING AMOUNT FOR LINE 6 OF THE WORKSHEET (OTHER CHILDREN LIVING WITH NON-PRIMARY CARE PROVIDER)

If the non-primary care provider has a legal obligation to support other children living in his/her home, the non-primary care provider is entitled to an adjustment. The amount of the adjustment is written on line 6. To determine the adjustment to be entered on Line 6, follow the steps in paragraphs 1, 2, 3, and 4, with some changes. In step 2, circle the amount in the Table under "Parents' Combined Adjusted Gross Income" that is closest to the non-primary care provider's gross income at Line 5. Do not circle the combined adjusted gross income of both parties in this case. In step 3, in the "Number of Children" column, circle the total number of other children living with the non-primary care provider that the non-primary care provider has a legal obligation to support. Do not circle the total number of children in this case.

Warning: If there is an existing child support order for the children in this case, the adjustment may not apply.

MAINE JUDICIAL BRANCH

CALCULATING THE NON-PRIMARY CARE PROVIDER ADJUSTMENT FOR SECTION 14b OF THE WORKSHEET

If the non-primary care provider pays directly out of pocket the cost of the child(ren)'s health insurance, child care for children under the age of 12 (or otherwise eligible), and/or extraordinary medical expenses, that parent's weekly support obligation must be adjusted. The amount of the adjustment is the cost of the health insurance for the children (line 10), the cost of child care for the child(ren) under the age of 12 (or otherwise eligible) (line 11), and the cost of extraordinary medical expenses for the child(ren) (line 12). Subtract lines 10, 11, and 12 from the Non-Primary Care Provider's support obligation to determine the amount that must be paid as support.

If the primary care provider pays the cost of the children's health insurance, child care for children under the age of 12 (or otherwise eligible), or extraordinary medical expenses, or if neither parent pays for health insurance, child care for children under the age of 12 (or otherwise eligible), or extraordinary medical expenses, enter 0 on the line next to "Non-Primary Care Provider Adjustment."
